BECOME 10X: BOOSTING YOUR PERFORMANCE AT WORK

WHAT WILL WE COVER TODAY?

- Crazy AI tools that will heavily boost your productivity as a working professional

- How can you leverage AI in work and personal life

- The big question - Will AI take your job?

be10X

Tool #1

Want to make a detailed research report on any topic?

be10X

Grok

APPLICATION:

Deep Search to make consultant level reports

be10x

Step 1: Go to Grok.com

Grok

Good evening, Aditya.
How can I help you today?

What do you want to know?

DeepSearch   Think   Grok 3 ⌄

Research   Create images   How to   Analyze   Personas

Step 2: Give it a customized prompt according to your need.

Good evening, Aditya.
How can I help you today?

act as a senior level consultant. make me a detailed research report on future of jobs because of this AI revolution

DeepSearch ⌄   Think   Grok 3 ⌄

Research   Create images   How to   Personas

Step 3: Enable the deep research option here

What is a prompt: In AI, a prompt is the input provided to a model to elicit a specific response

It will start generating the detailed and structured output

At the end, you will get a detailed report as per your requirement, also with all the references and its links.

How Is AI Impacting the Job Market?   linqto.com

See more (5)

Browsing results

- AI is set to shake up the job market, with some saying it'll displace jobs while others see new opportunities popping up. There's a lot here to unpack, and I'm curious how it'll play out.
- The IMF says about 40% of global jobs could feel AI's impact, with advanced economies facing bigger risks but also more chances to benefit (IMF). I'm thinking this could shape how we approach the report.
- I'm searching for more details on the IMF report to get key findings on AI's impact on jobs. This should help build a solid foundation for the report.

Key Points

- Research suggests AI will transform many jobs, with about 40% potentially affected globally by 2030, creating new roles while displacing others.
- It seems likely that jobs in office support, customer service, and manufacturing may decline, while healthcare, STEM, and AI-related roles like data analysts will grow.
- The evidence leans toward varied impacts across demographics, with younger workers and women facing higher risks but also opportunities for reskilling.
- There's debate on net job creation, with some studies predicting a net gain and others warning of significant displacement, especially in lower-wage sectors.

Overview of AI's Impact on Jobs

The AI revolution is reshaping the job landscape, with both opportunities and challenges. AI is expected to automate routine tasks, potentially affecting nearly 40% of global jobs by 2030, according to the IMF (AI Will Transform the Global Economy). While this could lead to job losses in areas like office support and customer service, it's also creating demand for new roles in technology and healthcare. For example, McKinsey predicts a 23% growth in STEM jobs by 2030 (Generative AI and the Future of Work).

An unexpected detail is the emergence of entirely new jobs, such as AI quality controllers and prompt engineers, which didn't exist a decade ago. This highlights AI's role not just in replacing tasks but in expanding the scope of work.

Tool #2

Want to make a PPT on it
as well?

be10X

Gamma app

APPLICATION:

Get entire PPTs done by entering effective prompts in under 60 seconds

be10x

Step 1: Go to Gamma.app

Step 2: Click on generate new

Step 3: After that you will get this interface choose the type of card that you want it to do

Step 4: Copy the content for which you have to make presentation and paste it in Gamma.app

Step 6: Adjust the presentation content type and style

Configuring your prompt...

**Step 5: After pasting select the type of what you want to make, like here we are selecting Presentation**
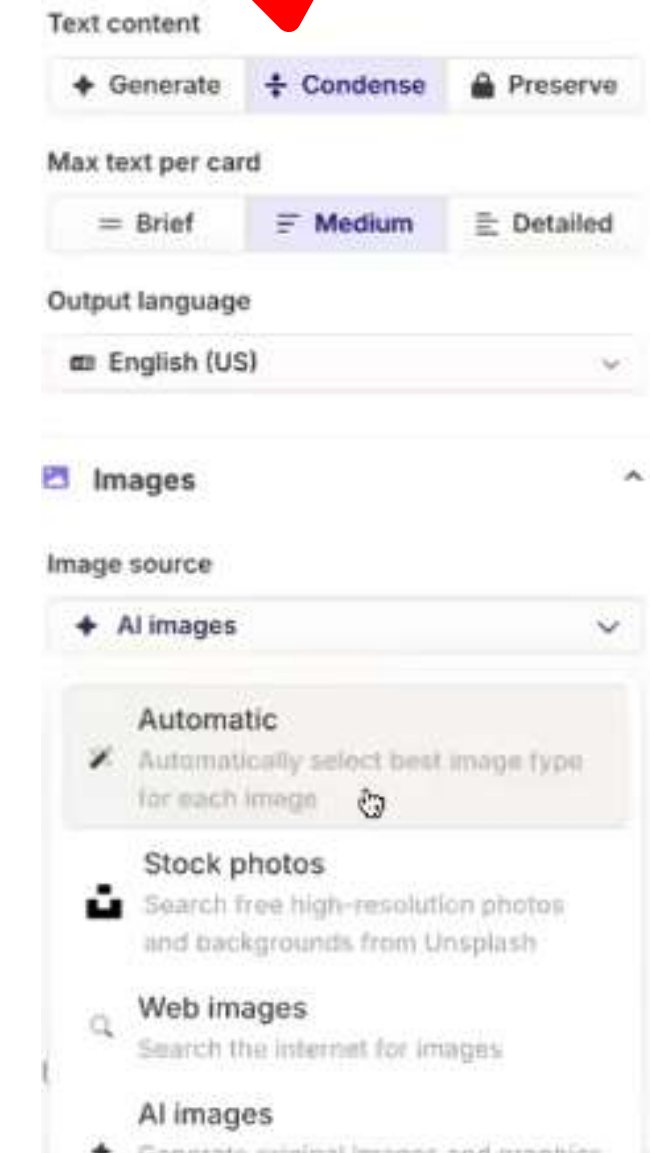

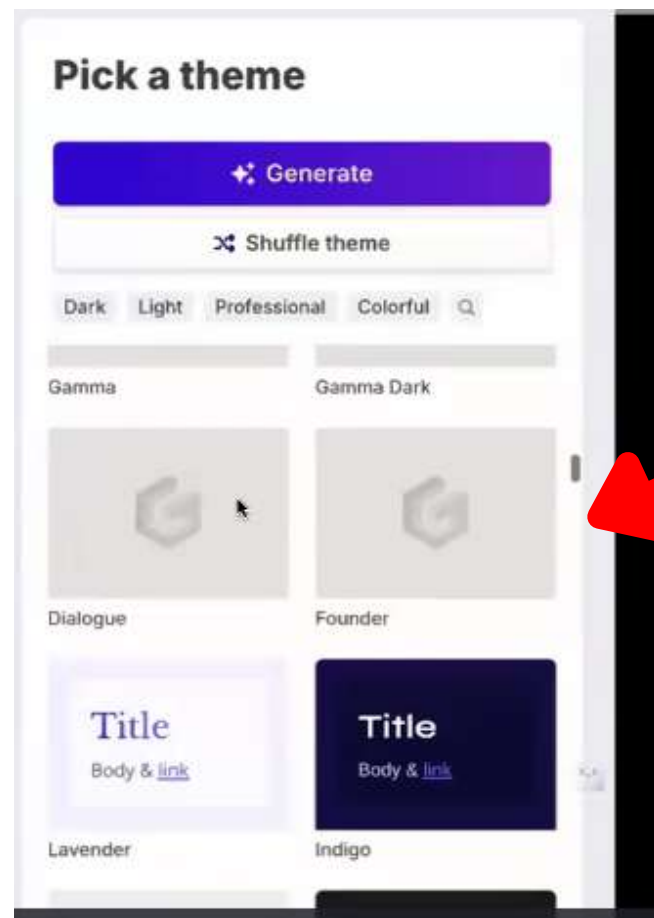

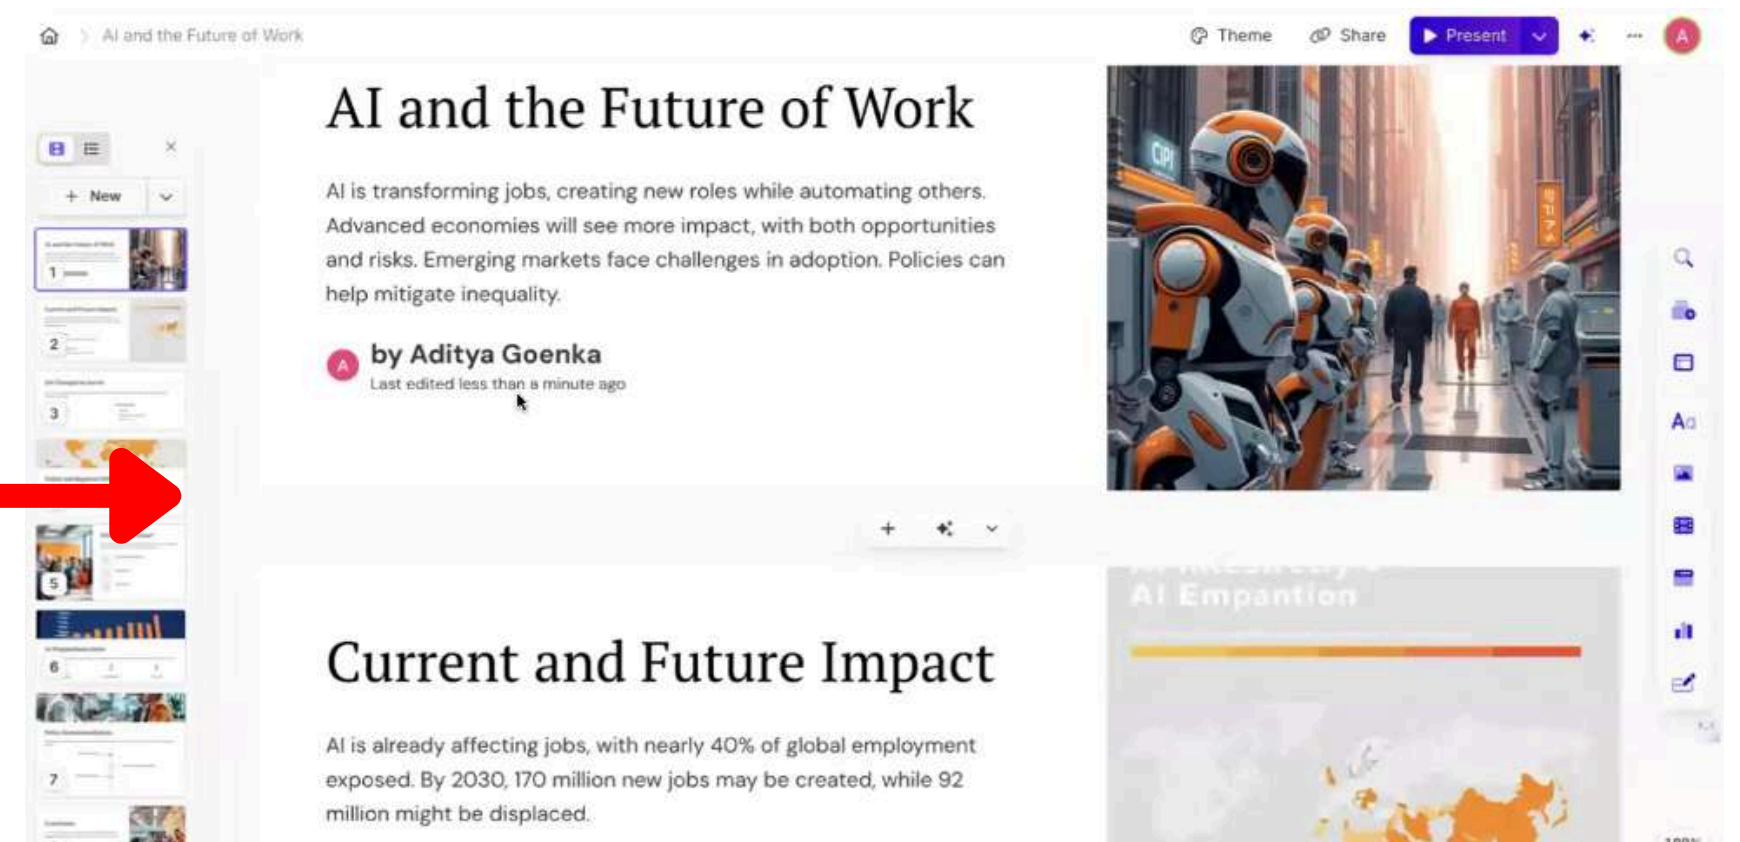

Step 7: Pick a desired theme
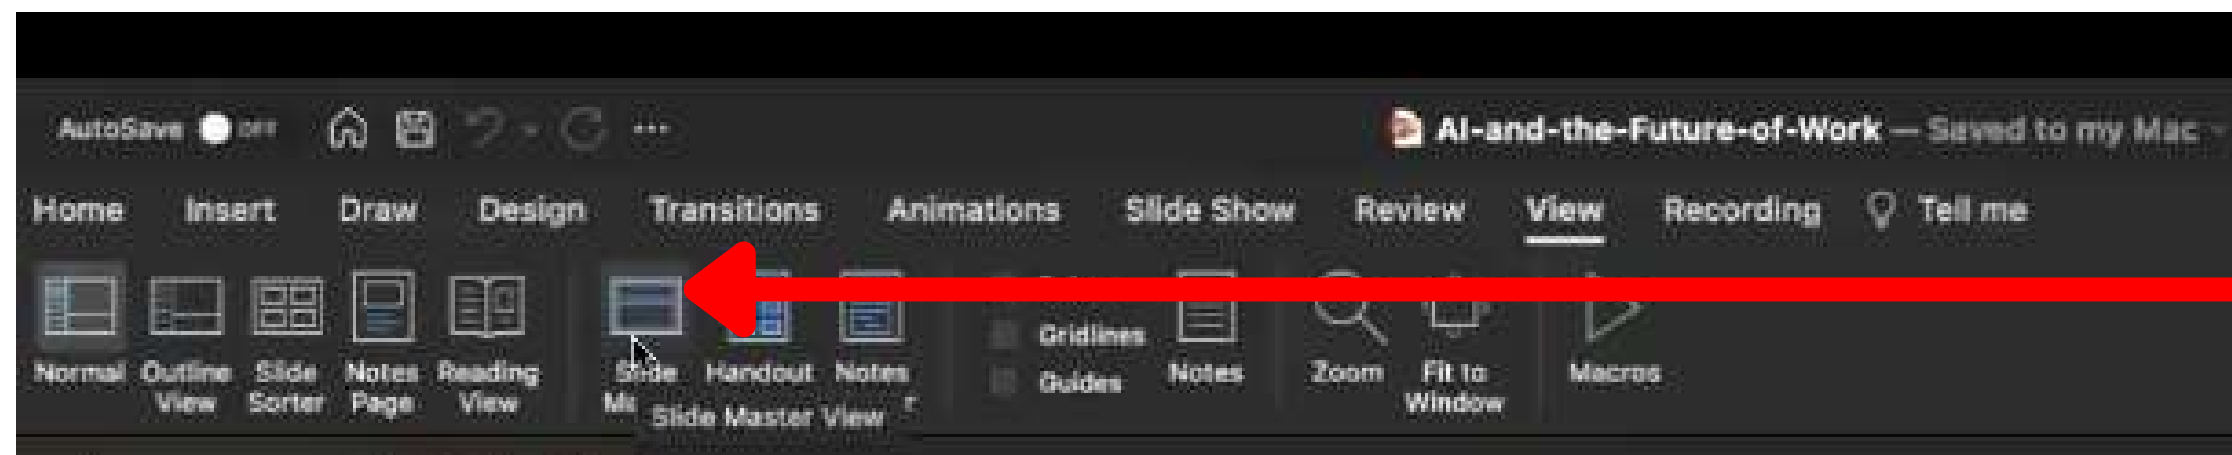

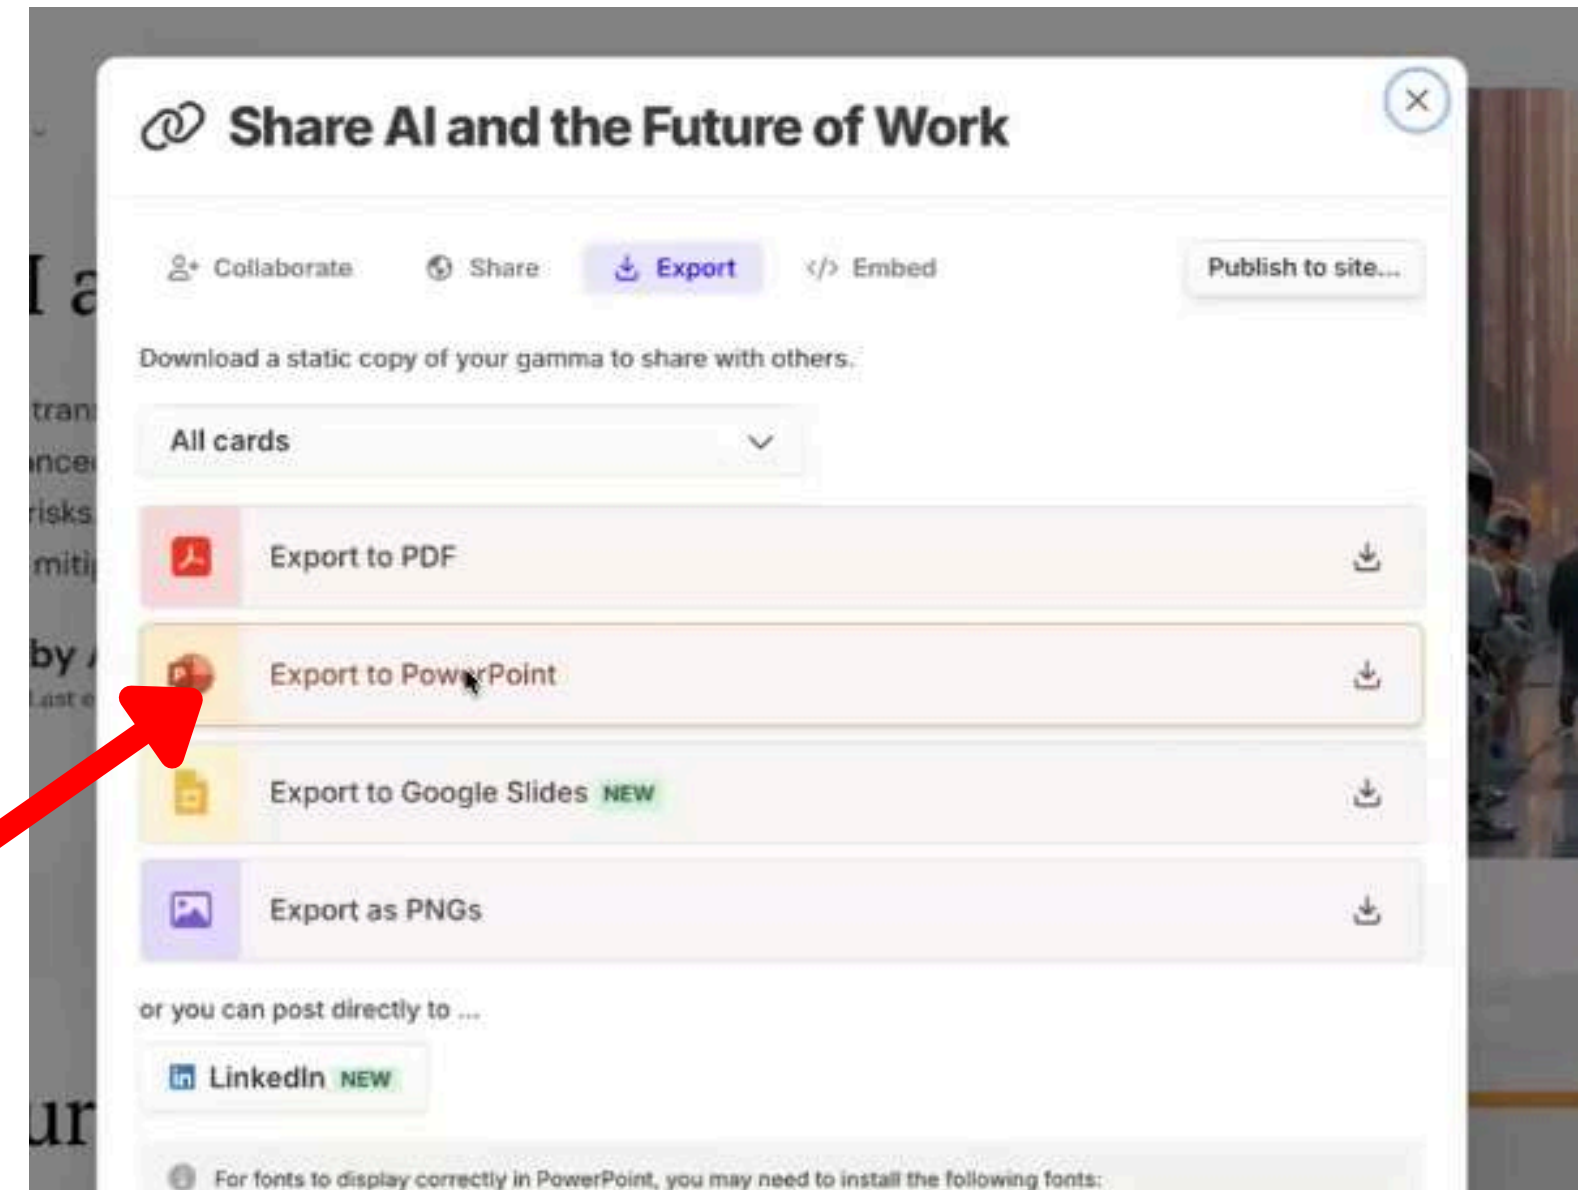

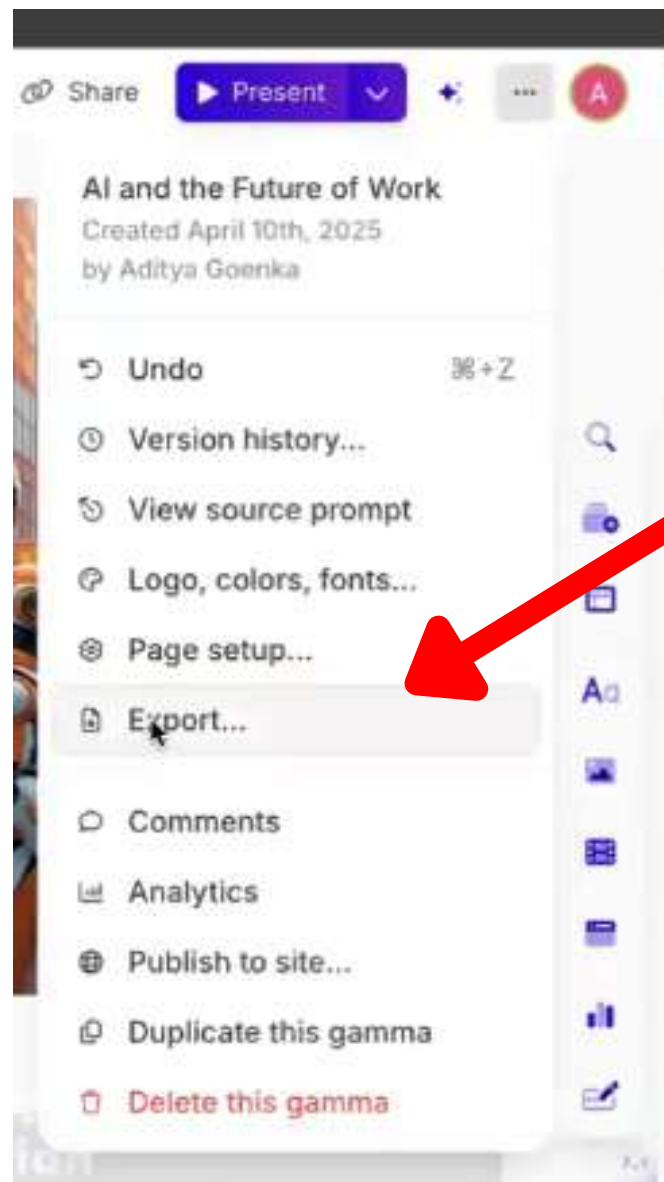

Step 8: Start generating the PPT

Your PPT will be generated in couple of minutes

Step 9: Download the PPT as per your required format

Step 10: Here we have selected Powerpoint type

Step 11: Remove the Gamma app logo and edit it more according to you, from here

Tool #3
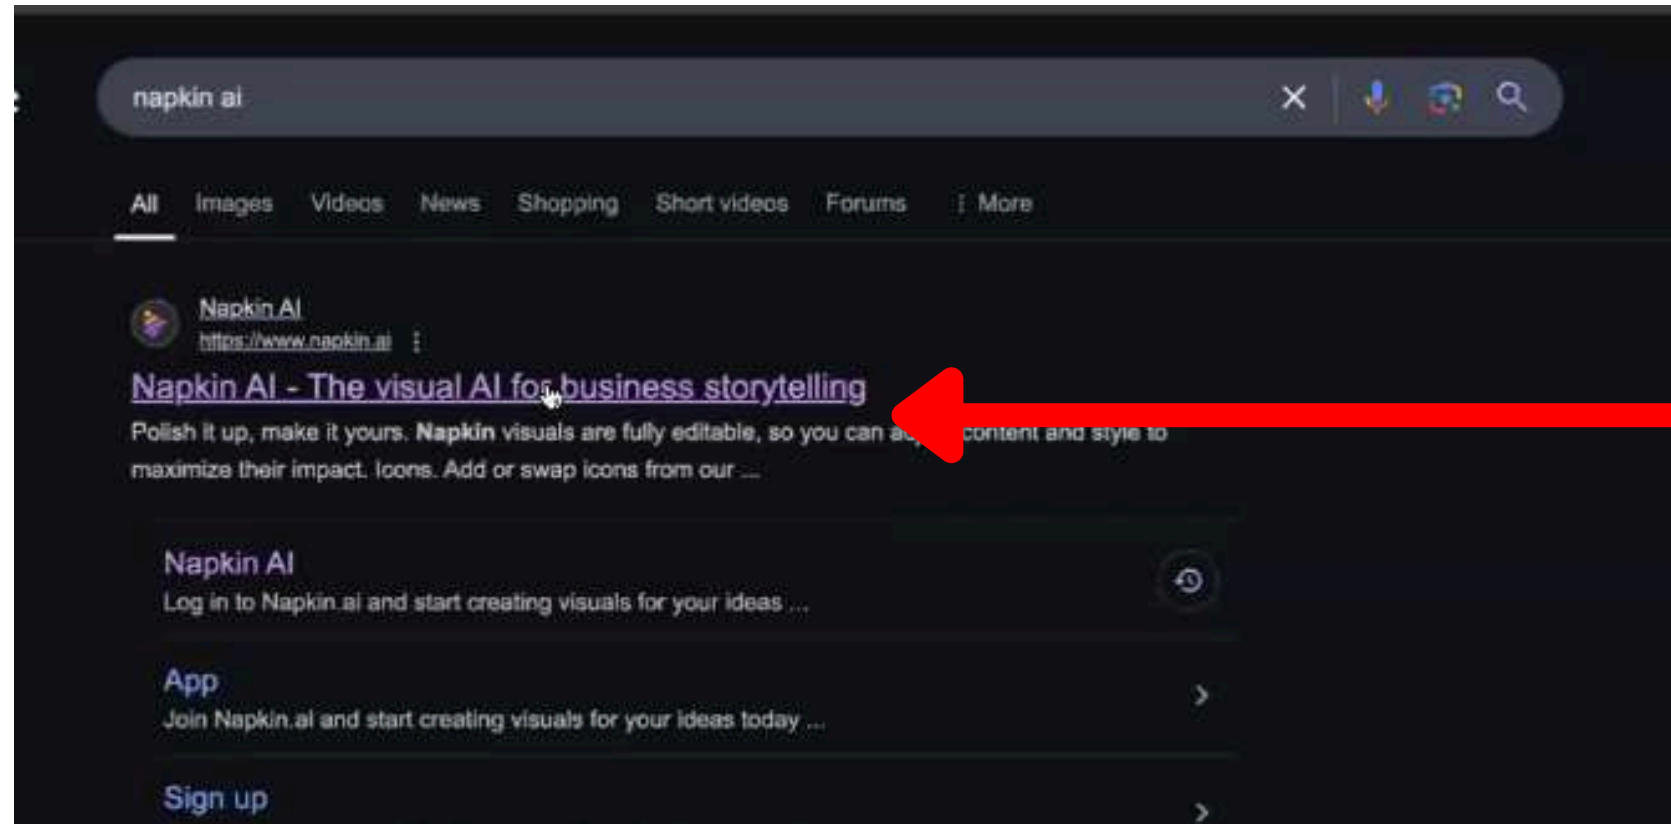

Want to make the PPT more professional and less AI-generated?

be10X

Napkin

APPLICATION:

Creates beautiful mindmaps from text

be10x

Step 1: Go to Napkin.ai

You will get a interface like this

Step 2: Click on New napkin

Emerging markets and low-income countries, with exposure rates of 40% and 26%, respectively, may face challenges in adopting AI due to insufficient digital infrastructure and skilled labor. However, they also have opportunities to leapfrog traditional development paths by integrating AI into their economies. The IMF's AI Preparedness Index, which measures readiness in areas like digital infrastructure, human capital, innovation, and regulation, ranks countries like Singapore, the United States, and Denmark at the top, highlighting the importance of preparation (IMF News on AI Preparedness).

Regional differences are also evident in employment statistics. For instance, the WEF's report suggests that technological trends like AI and robotics will have a more pronounced impact in advanced economies, where 86% of employers expect transformation by 2030, compared to lower rates in developing regions (Future of Jobs Report 2025). This underscores the need for tailored strategies to address varying levels of readiness and impact.
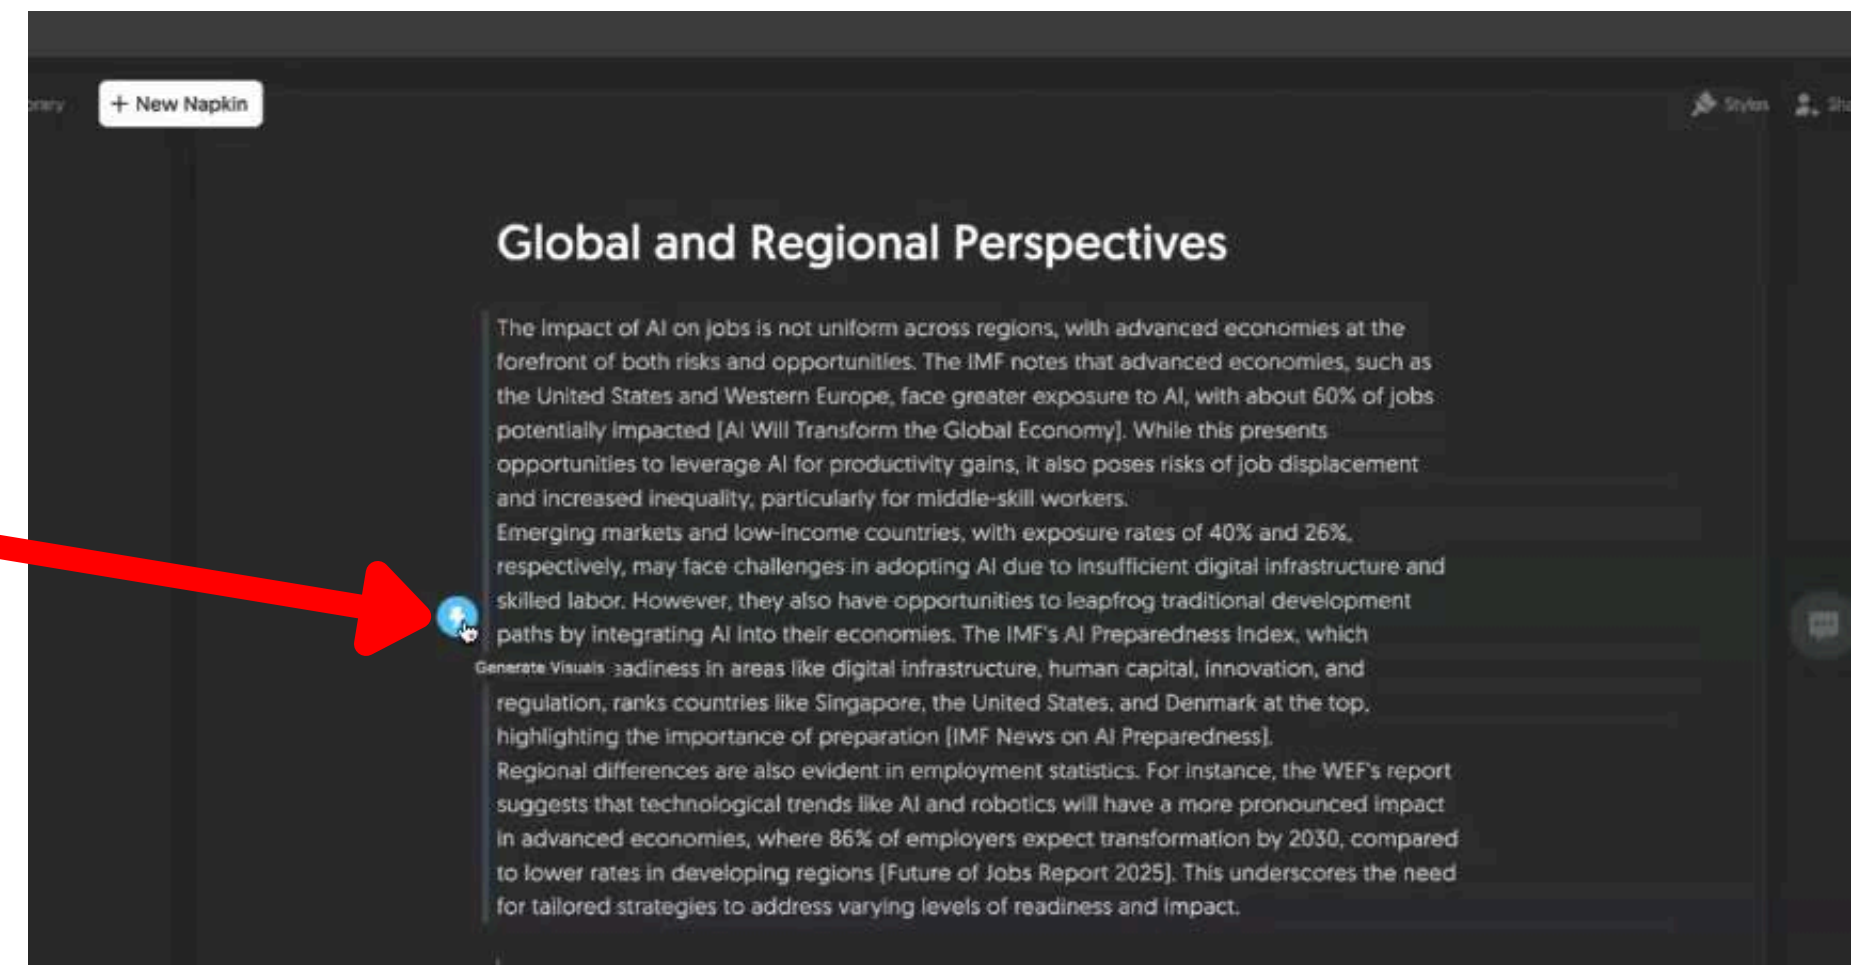

Policy and Strategic Responses

To mitigate the negative impacts of AI on jobs and maximize its benefits, governments and organizations must implement proactive strategies. The IMF recommends establishing comprehensive social safety nets and offering retraining programs for vulnerable workers to ensure an inclusive transition (AI Will Transform the Global Economy). This includes investing in digital infrastructure and education to prepare workforces for AI-integrated economies.

The Institute for Global Change provides specific recommendations for governments, particularly

Step 3: Copy the content of which you want to make stunning infographics and visuals and paste that in napkin ai

Step 4: After pasting the content click here to let it generate

+ New Napkin

Global and Regional Perspectives

The impact of AI on jobs is not uniform across regions, with advanced economies at the forefront of both risks and opportunities. The IMF notes that advanced economies, such as the United States and Western Europe, face greater exposure to AI, with about 60% of jobs potentially impacted [AI Will Transform the Global Economy]. While this presents opportunities to leverage AI for productivity gains, it also poses risks of job displacement and increased inequality, particularly for middle-skill workers.
Emerging markets and low-income countries, with exposure rates of 40% and 26%, respectively, may face challenges in adopting AI due to insufficient digital infrastructure and skilled labor. However, they also have opportunities to leapfrog traditional development paths by integrating AI into their economies. The IMF's AI Preparedness Index, which
Generate Visuals eadiness in areas like digital infrastructure, human capital, innovation, and regulation, ranks countries like Singapore, the United States, and Denmark at the top, highlighting the importance of preparation [IMF News on AI Preparedness].
Regional differences are also evident in employment statistics. For instance, the WEF's report suggests that technological trends like AI and robotics will have a more pronounced impact in advanced economies, where 86% of employers expect transformation by 2030, compared to lower rates in developing regions [Future of Jobs Report 2025]. This underscores the need for tailored strategies to address varying levels of readiness and impact.

After generating you will get multiple infographics and visuals

Select the visual that you like and export it, so that you can use it in your ppt and more.

Tool #4

Want to summarize any long article / blog / LinkedIn post or any sort of content piece?

be10x

Merlin chrome extension

APPLICATION:

Summarize any content piece and suggest replies as well

be10x

Step 1: Go to your browser and search for <u>merlin chrome extension</u>

Step 2: You will get a interface like this, add this merlin extension to your browser.

**Step 3:** On any webpage or web article, copy the content you want to summarize and then right click on that

Step 4: Click here and then click on give context to merlin.

Step 5: Give the merlin your desired prompt, like summarize it or make an engaging linked post out of it.

And done you will get your desired output in seconds.
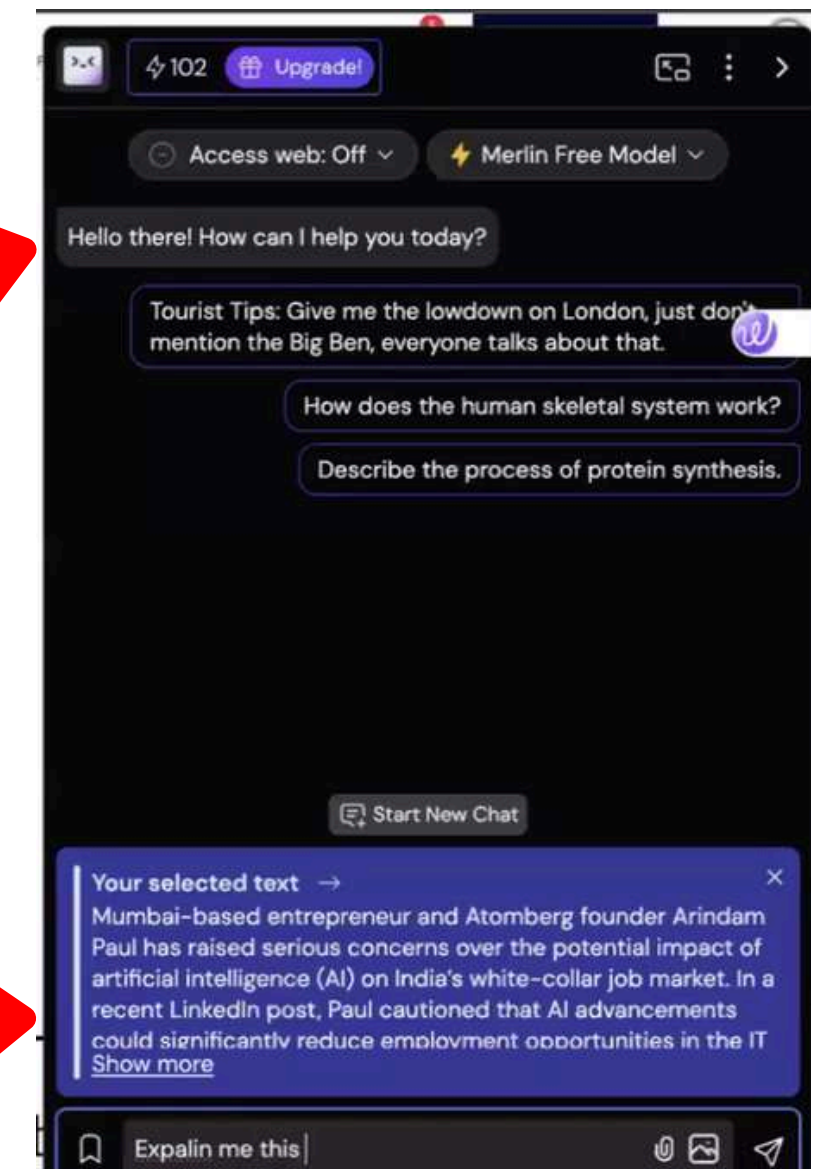

Summarize any video also in similar manner:

After installing merlin extension you will get a section like this click on generate summary

After generating you will get a minute by minute summary of the video, you will also get multiple features like key insights and essay.

Tool #5

Want to analyse a scanned PDF or a file and find insights from it?

be10X

Would you like to analyze stocks like Warren Buffet?

be10x

10X your PDF analysis
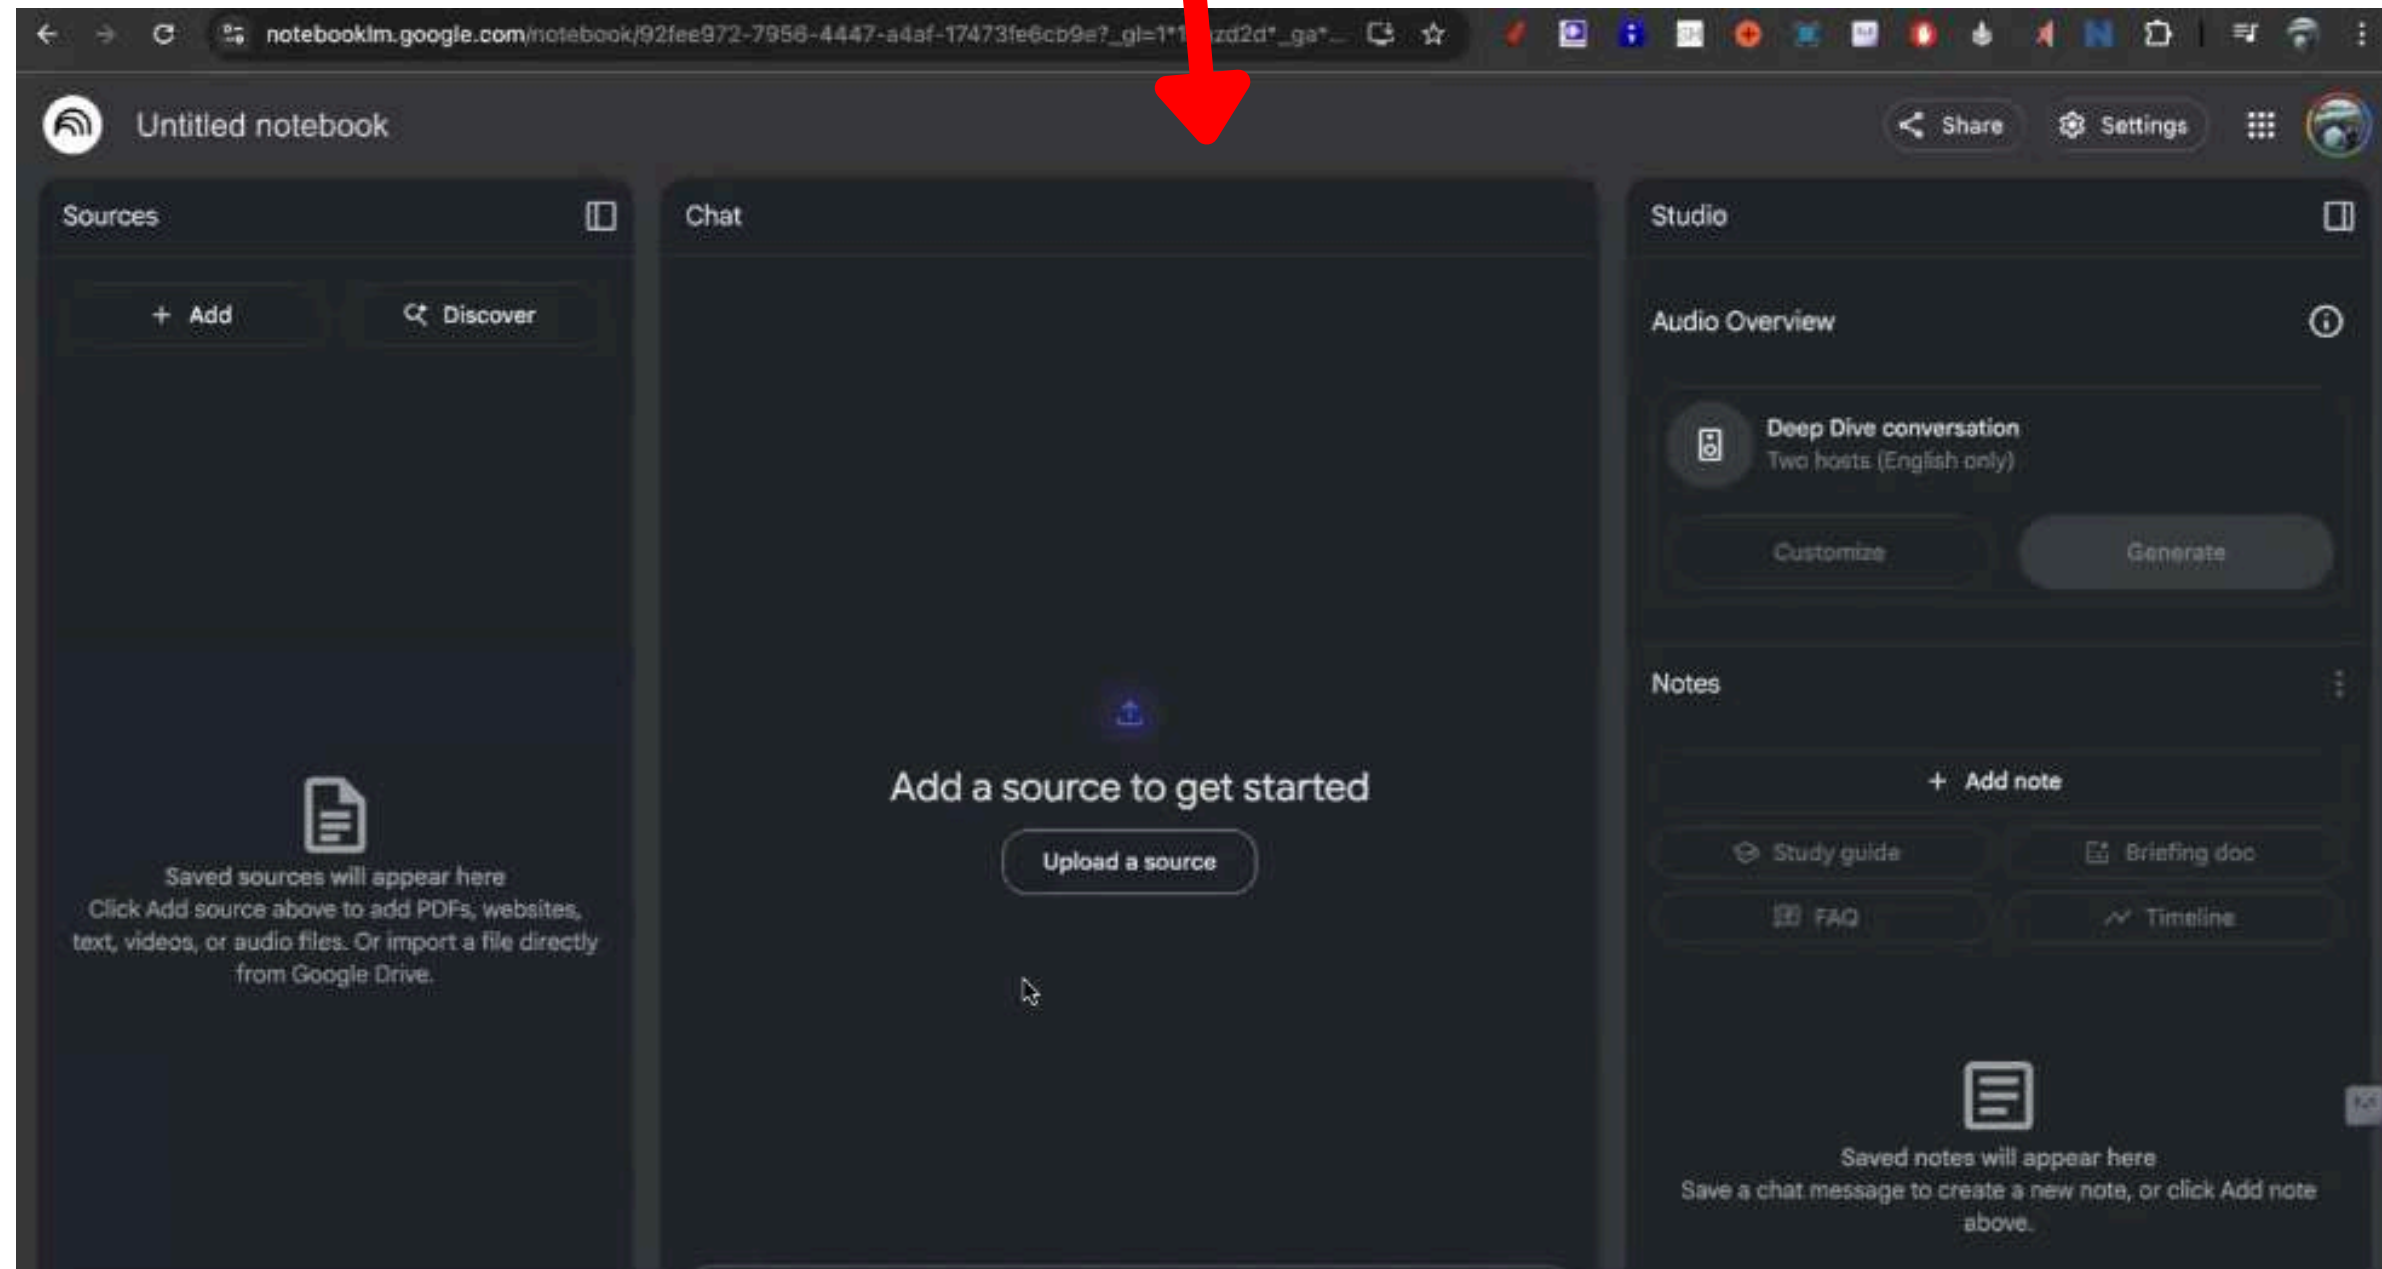

NotebookLM

Summarise any text

Summaries any PDF,
scanned document, book,
link, article at click of a
button

be10X

Step 1: Go to NotebookLM

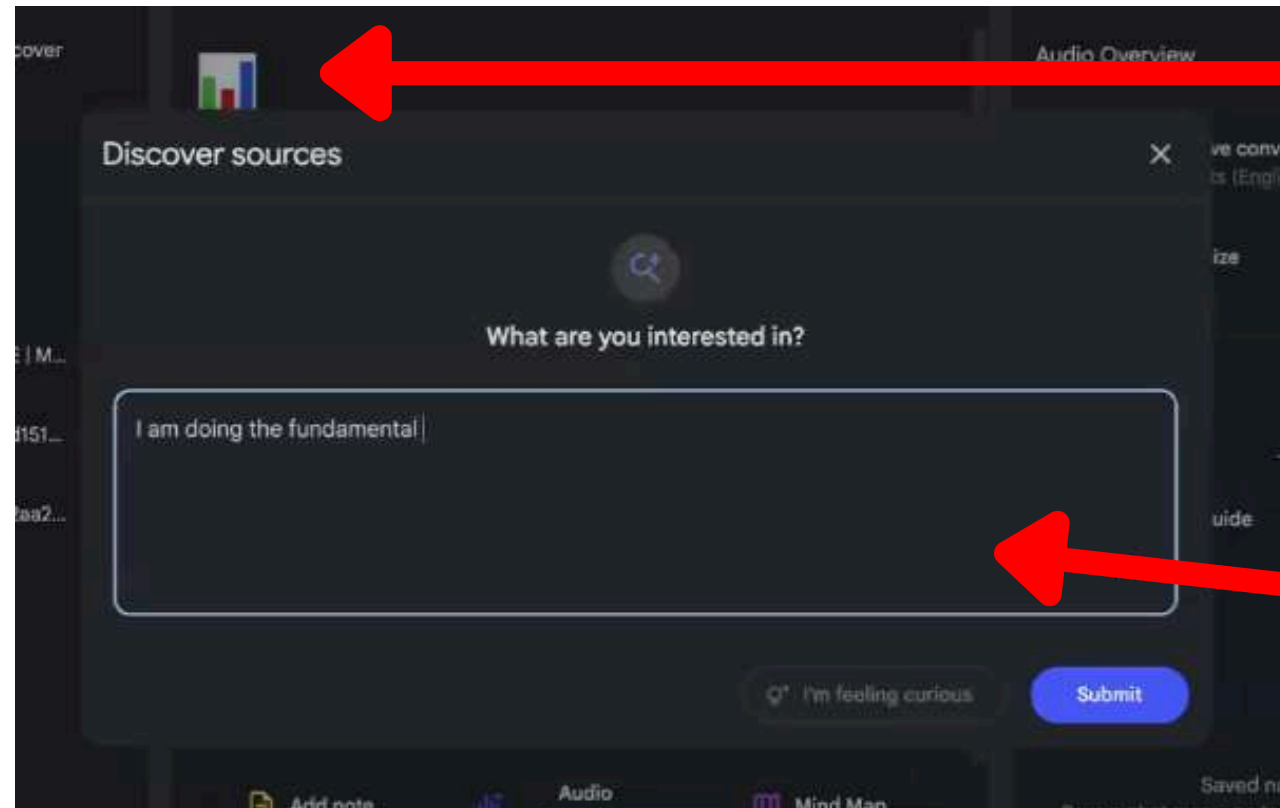

You will get a interface like this

You can add your sources(multiple) from here

You can upload multiple type of content like document, audio, video, YT link, Copied text and more

You can make it to search on web and add more related sources with their reference for better analysis

Just click on discover source option and give your desired prompt here

Discover sources

What are you interested in?

I am doing the fundamental

I'm feeling curious   Submit

After that give NotebookLM the prompt and wait for few seconds. And done you result will be ready.

Chat   Refresh

what are the business realince is involed in

Start typing...   15 sources

You can also make a podcast, study guide, FAQ's and more of your content from here.

Education

Bachelor of Technology in Computer Science
G. Pullaiah College of Engineering and Technology, Kurnool, Andhra Pradesh
2021–2025

Skills

- **Data Analysis & Visualization**: Proficient with tools like Pandas, NumPy, SciPy, Matplotlib, Seaborn, and Plotly.
- **Programming**: Skilled in Python, Java, and SQL.
- **Machine Learning**: Experience in regression, classification, clustering, and neural networks.
- **Big Data Technologies**: Familiar with Hadoop, Spark, and Hive.
- **Problem-Solving & Critical Thinking**: Adept at identifying actionable insights and addressing data challenges.
- **Communication**: Strong ability to present technical findings to non-technical stakeholders.

like to lend your expertise to train AI models?

About The Opportunity

- Outlier is looking for talented Mathematics students to help train generative artificial intelligence models
- This freelance opportunity is remote and hours are flexible, so you can work whenever is best for you

You may contribute your expertise by...

- Assessing the factuality and relevance of domain-specific text produced by AI models
- Crafting and answering questions related to Mathematics
- Evaluating and ranking domain-specific responses generated by AI models

Examples Of Desirable Expertise

After that it will ask you the required job description.

Step 4: Copy the job description and again paste it in the tool.

After that it will provide you the updates it need, your old and new ATS score. Update your resume after this.

Thanks for providing the job description! You're applying for a **freelance Mathematics AI training role at Outlier**, which focuses on evaluating AI-generated mathematical content and writing/explaining math-related concepts.

🔍 **Step 1: ATS Score Analysis (Before Optimization)**

Based on the comparison between your **current resume** and the **job description**, here's a breakdown of the ATS relevance:

Category	Match
Mathematics domain knowledge	❌ Not mentioned explicitly
AI/ML experience	✅ Strong match
Writing/communication skills	✅ Mentioned briefly
